DETAILED ACTION

Allowable Subject Matter

Tucker (US 6,390,309) fails to disclose a pivoting barrier arm that operates in response to an elongated object placed on the supporting strap.

Jay (US 4,426,011) fails to disclose a support strap that interacts with the pivoting end caps and the vertical supports. Jay teaches upwardly inclined supports, teaching away from the applicant's downwardly angled support arms, intended to assist in the placement and removal of elongated objects on and off the storage rack.

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: the storage rack comprising a support arm, a vertical support column, a barrier arm and a support strap, such that the support strap extends between an end of the support arm and an end of the barrier arm, wherein the barrier arm pivots from a substantially horizontal position when the support strap is relaxed, to a substantially vertical position when the support strap is under tension when supporting an elongate object, thereby reading over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
